Experience

Cod Soft (Web developer Intern**)**   Jun2024-Aug2024
- Built and maintained responsive web pages using HTML, CSS, and JavaScript, enhancing UI consistency and user engagement.
- Collaborated across teams to understand tech workflows, leading to better development decisions and smoother coordination.

It Nucleus (Intern, Paid)   Mar25-Apr25
- Improved SEO and site structure using semantic HTML, keyword research, and content optimization, boosting site visibility.
- Suggested SEO changes aligned with web standards, enhancing accessibility and search performance.

Outlier ai (Ai Trainer Freelance)   Apr25-Jun25
- Enhanced my web development and computer science skills through real-world client-driven projects.
- Collaborated with 15+ AI Trainers to deliver high-quality data for model training.

Projects

Numerology - Web App | GitHub, Html, CSS, JavaScript, React
- Built a fully responsive web application featuring 5+ numerology calculators. Enhanced user experience through dynamic form handling, real-time output display, and modal-based flows like "Book Appointment" and "Ask Your Questions." Ensured SEO-friendly semantic structure and consistent cross-device performance.
- Strengthened front-end development skills by working with modular components, form validation, and UX best practices. Gained hands-on experience with scalable UI design, DOM manipulation, and accessibility, while preparing the project architecture for future backend integration.

Codeforces Bot — WhatsApp Bot | GitHub, Python, Flask, NodeJS, MongoDB
- Developed a WhatsApp bot capable of delivering daily Competitive Programming questions from Codeforces directly o users based on their selected difficulty level
- The bot provides a convenient platform for programmers to enhance their skills and stay engaged with coding challenge seamlessly through WhatsApp, a widely used messaging application

Certifications

WordPress (Coursera) | Web Development (Grapple Tech) | Frontend Development (Cod Soft)
